

Workshop on Global Internal Audit Standards and Practical Tools for Auditors

This two-day training program equips internal auditors, fraud examiners, and risk professionals with a comprehensive understanding of the Global Internal Audit Standards™ and the practical tools needed to apply them effectively. Participants will explore the transition from the IPPF to the new Standards, their impact on internal audit functions, and quality assessment requirements, while also gaining hands-on skills in MS Excel and MS Word for data analysis, fraud detection, and impactful reporting. The program concludes with a focus on risk management and heat maps, enabling auditors to strengthen risk-based auditing and deliver greater organizational value.

Who Should Attend:

This workshop is ideal for:

- Chief Audit Executives (CAEs)
- Internal Audit Managers & Supervisors
- Internal Auditors & Senior Auditors
- Risk and Compliance Professionals
- Audit Committee Members seeking to understand new expectations
- Quality Assurance & Improvement Program (QAIP) Teams
